SUMMARY

Passionate backend software engineer with a strong background in Java and backend technologies. I specialize in designing and developing scalable, efficient, and reliable backend systems. My proficiency extends to tools like Git, SQL, JIRA, Maven, Kotlin, Spring, and Agile methodologies, enabling me to deliver high-quality solutions. I am a collaborative team player, highly adaptable to changing requirements, and constantly staying up-to-date with the latest advancements in backend development.

WORK EXPERIENCE

Junior Full Stack Developer, Aiton Caldwell SA

Apr 2024 - Present

- Implemented and expanded the "Schedule a Call" option, extending the existing callback widget feature to provide greater customer service flexibility.
 - Maintained and enhanced core functionality for legacy VOIP applications built primarily in PHP.
 - Utilized Java/Spring Framework for modern API development and core integrations.
 - Actively diagnosed and resolved complex application issues, ensuring system stability and client satisfaction.
 - Managed the full deployment cycle utilizing Docker and Jenkins in a Linux environment.
 - Maintained team knowledge by consistently expanding technical documentation in Confluence.
-

EDUCATION

Bachelor of Engineering in Computer Science

Oct 2021 - Mar 2025

WSB Merito University Gdansk

- Specialization in Programming.
-
